**TWAIN Scanning:** Most common scanner driver. Works with all types of scanner and camera devices.

**ISIS Scanning:** Improves performance on document scanners. Allows saving settings and multi-image display option.

**PEG 1D Barcode:** Recognizes most 1D barcode types. Recognition speed is limited to 6 barcodes/second.

**PEG 2D Barcode:** Recognizes 2D barcodes like PDF417, DataMatrix, etc. and removes processing speed limit.

**DTK Barcode:** Recognizes most 1D and 2D barcode types. Slightly slower and less accurate than Pegasus engine.

**ABBYY OCR:** Enables all Optical Character Recognition functions to read printed text from images.

**Search PDF:** Output searchable Image + Hidden Text PDF files that let you view the image but search/select the text.

**Text Parsing:** Extract index values from existing text in Office docs, PDF files or already OCR'd images.

**Server Mode:** Allows unattended processing as a scheduled task or windows service for up to 1 million pages / year. Additional annual processing volume may be purchased. **Pegasus Server** allows for unlimited barcode recognition.

**Barcode Printing:** Includes SimpleCoversheet to automate the printing of barcode labels or index separator sheets.

**Email & FTP:** Includes SimpleSend to automate document distribution via eMail, FTP or network file replication.

**QC Station:** Includes SimpleQC to quickly review, enhance or rescan documents.

**Search Indexes:** SimpleSearch lets you search indexes and quickly view documents. Can also be done in SimpleIndex.

**Export to Any DMS:** SimpleExport converts index data to any format using XSL. Allows integration with any system that can auto-import documents from a text or XML index file.
