

## Document Capture in Transportation & Logistics

Pick tickets, proof of delivery (POD), bills of lading (BOL), these are the lifeblood of the logistics and distribution industries. Take one away and the carrier can't prove that an order was pulled or reached the customer who signed for it. And when you take away that proof, the whole system breaks down as customers may be unwilling to pay. The solution is to scan these paper docs and make them available with a few clicks of the mouse.

**SimpleIndex** lowers costs by automating the data entry required to organize scanned files, extracting key information using powerful recognition features normally found only in expensive scanning solutions. **SimpleIndex** can read the barcodes or text information on your forms to capture transaction and customer information. Documents are linked to your customer data for easy retrieval and viewing. **SimpleView**, allows you to search and view documents as well as combine, trim, rescan, resize and perform OCR all in one easy, customizable interface. .

**SimpleIndex** is ideal as an inexpensive, standalone application for small shippers, or a distributed data capture solution for large companies with multiple warehouses and diverse facilities.

Enhanced Document Access

### Benefits of **SimpleIndex** to Transport Companies

- Capture BOL, POD, and pick tickets.
- Link those documents to customer records.
- Isolate signature areas to separate image files if needed.
- Upload Files into ANY Database, Document Management System, or Custom Application Remotely to Improve Operations.
- Create Digital Tracking Files — from Order to Delivery.
- Eliminate the Costs of Storage & Time spent searching.
- Increase Staff Productivity, Efficiency, and Satisfaction.

**SimpleIndex's** most powerful feature is its simplicity! Complex scanning workflows can be performed with just a single mouse-click. Installation is quick, and training is minimal. You can even use your digital copier to scan files and let **SimpleIndex** process them automatically.
